

End of Market Day

Did your market pack away the POS station and put away the signage, tokens and other supplies left at the SNAP/market booth?

Did your market keep separate the tokens returned from the farmers/vendors from the unused tokens?

Did your market issue token reimbursement to all vendors by check & deliver to vendors next market day, or mail checks monthly?

Did your market reconcile sales reports weekly to end-of-month balance of market's checking account?

When market is not able to reconcile reports, the error must be found! Work with your market's POS provider.
